

Tips for Scanning and Uploading Transcripts

Copies of official transcripts can be uploaded to the application portal to expedite the evaluation process. Transcripts and degree certificates must be legible in order to avoid delays in the processing of your application. Uploaded documents that are unclear or that do not adhere to the guidelines below will not be accepted.

Use the following guidelines to ensure a successful upload. Records will not be accepted.

- Transcript legends (the page that lets us know how to read your transcript) must be included on all transcripts, as each legend is unique to that university. Often, the legend is on the back of the transcript.
- If a transcript is in a language other than English, an official English translation must be submitted.
- If you have not graduated yet, we will accept a current progress transcript.
- Uploaded transcripts MUST be submitted as a PDF file.
- If uploading transcripts from multiple universities, each transcript should be uploaded as a separate, single file.
- Submit only one transcript per institution.

If an individual transcript is multiple pages, make sure to submit it as one file. Multiple pages of a transcript will not be accepted as separate files.

The ULLafayetteHelp Desk offers a number of free software products that can be used for combining documents into one PDF file.

- Keep all transcript pages, marksheets, and degree certificates in the correct order they are received from the issuing institution.
- When scanning, ensure that the institution name and other identifying marks are clear.
- Remember that a lower dpi = more legible text. We recommend scanning at 200 dpi or less.
- If you do not have access to a good quality scanner, many public departments (e.g., a public library) offer scanning services.
